

Planmeca Pro50™ Chair

The patient chair for premium comfort

ENGLISH

PLANMECA

Have a seat!

Planmeca Pro50™ Chair is a great combination of functionality, flexibility and future-proof details, all wrapped up in a beautiful, timeless design. It is an ideal option for those looking for a sturdy yet lightweight patient chair – offering ultimate comfort for both the dental team and patients. Have a seat!

Silent and sturdy

Planmeca Pro50™ Chair is a modern and timeless patient chair featuring all the lightweight and beautiful design details that Planmeca products are known for. The medical grade motors inside the chair make its movements smooth and silent, ensuring a quiet working environment for the dental team and a relaxing treatment experience for the patient. The chair is built from durable aluminium and its upholstery comes in a wide range of fun and appealing colours.

First-class ergonomics

Planmeca Pro50 Chair offers a wide height range – the patient seat height can be varied between 390 mm and 890 mm. This makes the chair suitable for different users and working styles, allowing dental professionals of all sizes to work sitting (on a regular stool or on a saddle stool) or standing. The small chair base leaves plenty of room for two pairs of legs as well as the foot control and other devices. The additional space, combined with the chair's slim and narrow backrest, allows the dental team to get close to the patient – always in the most ergonomic working position.

A smooth and flexible workflow

For those working with a 12 o'clock cabinet or tray, the chair's unique lifting mechanism ensures that the distance from the headrest to the cabinet remains the same at every height and the operating light doesn't need to be readjusted as the chair height changes. What's more, the chair has an optional mobile base, making it easy to move to a new treatment room when necessary.

Premium patient comfort

Planmeca Pro50 Chair has a folding legrest that provides easy entry and exit and facilitates face-to-face positioning – a feature that is greatly appreciated in doctor-patient consultations. As patients come in different shapes and sizes, the maximum patient weight for the chair is 185 kg. The **Ultra Relax™** upholstery adapts perfectly to the patient's body shape – allowing them to stay relaxed even during the longest treatment sessions.

From Finland

All Planmeca products are designed and crafted in our own factory in Finland, using the latest technology and the best materials. With decades of experience in dental chair design and manufacturing, we listen closely to customer feedback to continually enhance and refine our products, which are always manufactured under fair working conditions.

Choose the details for your ideal dental chair
